

Advanced course part 2

Clinical Management of Craniomandibular and Craniofacial Dysfunction and Pain

Course objectives

- Craniomandibular dysfunction: Differentiation by provocation tests, assessments and treatment of functional craniomandibular instability
- Assessment and treatment of patients with dysphonia
- Correlation of pediatric posture with craniofacial dysfunction, neuromusculoskeletal assessment and treatment of the maxillofacial complex.
- Further information on the treatment of chronic tooth pain.
- Introduction to craniofacial pain management and application of some pain management strategies.
- Application of knowledge through assessment and treatment of patients and patient presentation with two follow up's
- Deepening of clinical reasoning strategies specifically orientated on the craniomandibular and craniofacial region employing lectures, patient case history and patient attendance

The course script was composed by Harry von Piekartz on behalf of the **Cranio Facial Therapy Academy (CRAFTA®)**. Colleagues of CRAFTA® and the feedback of the students provided important suggestions.

The script will be permanently updated. All courses are supported by the books "Craniofacial dysfunctions and pain" (2001) and "Craniofacial pain - neuromusculoskeletal assessment, treatment and management"(2007) published by Butterworth Heinemann (edit. Harry J.M.von Piekartz) and the latest literature.
